

2241 - Teaching Survey Fall 2023

Fall 2023 - Abhiram Kumar MATH 0420 - INTRO THEORY 1-VARIABLE CALCUL - 1030 - Recitation

Created Friday, December 22, 2023

Courses Audience: 20
Responses Received: 10
Response Rate: 50.0%

Report Comments

Included in this report:

- Summary of responses to scaled questions
- Response breakdowns
- Student comments
- Results to instructor added custom questions (if applicable)

Understanding and using student feedback:

- We have [resources](#) and you [may schedule a consultation with a member of our Teaching Support team](#) to help interpret your results and develop a course of action if necessary.
- In the future:
 - Discuss, teach, and model [giving meaningful feedback](#) with your students and give them multiple opportunities to practice giving feedback.
 - Gather important information about students at the beginning of the term by giving a [pre-course survey](#).
 - Check in with students half way through the term by giving a [midterm course survey](#).
- The [Teaching Center](#) offers multiple resources to support teaching and learning.

Standard Deviation	0.85

What did you like best about the recitation instruction?

Comments
He explained things in a way that was easy to understand. He showed us a lot of example exercises. He was frequently available for help.
The examples provided really did help with understanding how to approach the homework and exam problems. I also feel like you really listened to us with what we said we struggled with and aimed to make us all more comfortable with that material.
He provided examples in recitation that I felt should have been provided in lecture.
I liked that the instructor had examples problems that he would go through to help us with more difficult concepts, and made sure to ask if we all understood what was just shown.
He simplified the concepts and made it a lot easier to understand. He would help us with any questions that we had. I honestly learned more in recitation and office hours than I did in class.
He was very available to questions
He made difficult topics a lot easier. Explained things simply and in a way that made them easy to understand. We went over examples that were very useful in aiding understanding.
It was nice to go over some examples at a more manageable pace since the lecture went pretty fast.

If you were running this recitation, what would you do differently?

Comments
I would be more prepared in knowing what the class had covered the prior week.
Really nothing. It eased the panic of not understanding things in class, and you were a really great TA for the recitation.
probably nothing
Nothing different.
I like that he started by asking if we had any questions, I think maybe it would have been helpful if he could do more questions similar to the exercises on the homework
Less lecture

Math Recitation Additional Items

Please answer the following questions about your recitation instructor:

1. Did you experience difficulty in comprehending your recitation instructor's spoken language in recitation?

No difficulty at...	8	80.00%	<div><div></div></div>
