
THE ORGANIZATION OF INFORMATION

Third Edition

Arlene G. Taylor and Daniel N. Joudrey

Library and Information Science Text Series

A Member of the Greenwood Publishing Group

Westport, Connecticut • London

CONTENTS

List of Figures	xv
Preface	xix
Acknowledgments by Arlene G. Taylor	xxiii
Acknowledgments by Daniel N. Joudrey	xxv
1 Organization of Recorded Information	1
The Need to Organize	1
The Nature of Information	3
The Nature of the Organization of Recorded Information	4
Organization of Information in Different Contexts	8
Libraries	8
Archives	11
Museums (Art and Object Collections)	13
The Internet	15
Digital Libraries and Archives	17
Information Architecture	20
Indexing and Abstracting	21
Indexing	22
Abstracting	23
Records Management	24
Knowledge Management	27
Conclusion	29
Notes	29
Suggested Readings	33
2 Retrieval Tools	39
The Need for Retrieval Tools	39
The Basic Retrieval Tools, Their Formats, and Their Functions	40
Bibliographies	40

Pathfinders	43
Catalogs.	43
Purposes of Catalogs.	44
Forms of Catalogs	47
Book Catalogs	47
Card Catalogs	48
Microform Catalogs	49
OPACs	49
Arrangements within Catalogs.	49
Classified	50
Alphabetical.	51
Chronological and Other.	52
Indexes	52
Finding Aids	57
Registers and Other Museum Databases	59
Search Engines and Directories	60
Conclusion	62
Notes.	62
Suggested Readings	65

3 Development of the Organization of Recorded Information in Western Civilization	67
Inventories, Bibliographies, Catalogs, and Codification	67
Antiquity	67
Middle Ages	69
European Renaissance	70
From Inventories to Finding Lists to Collocating Devices.	71
Period of Codification	73
Twentieth Century	75
Description	75
Subject Access.	77
Verbal Subject Access	77
Classification	78
Special Materials.	80
Archives	80
Museums (Art and Object Collections)	80
Subject Access to Special Materials	81
Mechanization of Bibliography	81
The Documentation Movement	81
Library Automation	83
Conclusion	84

Notes	84
Suggested Readings	85
4 Metadata	89
The Basics of Metadata	91
Metadata Schemas	94
Metadata Characteristics	95
Categories of Metadata	96
Administrative Metadata	96
Technical Metadata	98
Preservation Metadata	98
Rights and Access Metadata	99
Meta-Metadata	99
Structural Metadata	100
Implementations of Structural Metadata	101
METS (Metadata Encoding & Transmission Standard)	101
Descriptive Metadata	102
Metadata Models	103
Functional Requirements for Bibliographic Records (FRBR)	103
User Tasks	104
FRBR Entities and Attributes	106
FRBR Relationships	107
Resource Description Framework (RDF)	109
DCMI Abstract Model (DCAM)	113
Metadata Management Tools	114
Application Profiles	114
Metadata Registries	116
Crosswalks	116
Harvesting Tools and Templates	117
Metadata and Cataloging	117
Conclusion	120
Notes	121
Suggested Readings	125
5 Encoding Standards	129
Encoding of Characters	130
Encoding of Records	131
MARC (MACHine-Readable Cataloging)	132

MARC 21	137
UNIMARC	140
The Future of MARC	141
SGML (Standard Generalized Markup Language)	142
HTML (HyperText Markup Language)	143
XML (Extensible Markup Language)	144
TEI (Text Encoding Initiative) Schema	147
EAD (Encoded Archival Description)	
DTD and Schema	147
ONIX (Online Information eXchange)	
DTD and Schema	149
MARCXML Schema and MODS	153
Conclusion	153
Notes	155
Suggested Readings	157
6 Systems and System Design	159
Systems	159
Databases	161
Bibliographic Networks	163
Integrated Library Systems (ILSs)	164
History of the ILS	164
ILS Developments	165
Development of Online Public Access	
Catalogs (OPACs)	166
System Design	169
Organization of Information and System Design	169
Searching Methods	170
Retrieval Models	171
Standardization and Systems	172
Display	173
Display of Retrieved Results	173
Display of Records	174
Display Guidelines	176
Basic Search Queries	177
Initial Articles	179
Truncation, Boolean Operators, and Proximity	179
Punctuation	180
Federated Searching and Z39.50	181
Z39.50	183
User-Centered System Design	184

Universal Design	185
Multiple Languages/Scripts	185
Other Aids for Users	186
Authority-Control Integration	187
Conclusion	190
Notes	191
Suggested Readings	196
7 Metadata: Description	199
Units to be Described	200
Finite versus Continuing Resources	201
FRBR's Entities	202
Creation of Surrogate Records	203
Bibliographic and General Metadata Schemas	205
International Standard Bibliographic Description (ISBD)	205
Anglo-American Cataloguing Rules, Second Edition, 2002 Revision (AACR2R)	209
The Dublin Core (DC)	213
Metadata Object Description Schema (MODS)	219
Domain-Specific Metadata Schemas	220
General International Standard Archival Description (ISAD(G))	220
Describing Archives: A Content Standard (DACS)	222
Encoded Archival Description (EAD)	224
TEI (Text Encoding Initiative) Headers	225
FGDC (Federal Geographic Data Committee) Content Standard for Digital Geospatial Metadata (CSDGM)	225
VRA (Visual Resources Association) Core	227
Categories for the Description of Works of Art (CDWA)	229
Cataloging Cultural Objects (CCO)	230
ONIX (ONline Information eXchange)	231
Other Surrogate Record Types	232
Index and Bibliography Records	232
On-the-Fly Records	232
Conclusion	234
Notes	235
Suggested Readings	240

8 Metadata: Access and Authority Control.	245
Access	245
Bibliographic Relationships	246
Authority Control.	249
Authority Work	252
Authority Files.	254
International Authority Control	256
Models and Standards for Authority Control.	258
General Bibliographic Models and Standards	258
Functional Requirements for Bibliographic	
Records (FRBR)	259
Functional Requirements for Authority	
Data (FRAD)	259
Anglo-American Cataloguing Rules, Second	
Edition, 2002 Revision (AACR2R)	262
Primary Access Point.	262
Main Entry Controversy	264
Justification for Choice of Primary	
Access Point	265
AACR2 Principles for Choosing	
Primary Access Point.	271
Additional Access Points.	273
Headings for Access Points.	274
Statement of International Cataloguing Principles	
and RDA: Resource Description and Access	281
Dublin Core Agents	285
Metadata Authority Description Schema (MADS)	285
Standards for Archives	285
International Standard Archival Authority	
Record for Corporate Bodies, Persons,	
and Families (ISAAR (CPF))	286
Encoded Archival Context (EAC)	287
Describing Archives: A Content	
Standard (DACS)	287
Standards for Art and Museums	288
Cataloging Cultural Objects (CCO)	288
Categories for the Description of Works	
of Art (CDWA)	291
VRA (Visual Resources Association) Core	292
Semantic Web.	293
Conclusion	293

Notes	294
Suggested Readings	299
9 Subject Analysis	303
What Is Subject Analysis?	305
Challenges in Subject Analysis	306
Cultural Differences	307
Consistency	307
Nontextual Information	308
Exhaustivity	310
Objectivity	313
Differences in Methods Used	314
Langridge's Approach	314
Wilson's Approaches	315
Use-based Approaches	316
Conceptual Analysis Process	317
Item Examination	317
Content Examination	320
Identification of Concepts	320
Topics Used as Subject Concepts	321
Names Used as Subject Concepts	321
Chronological Elements	322
Content Characteristics	322
Research Methods	323
Point of View	323
Language, Tone, Audience, and Intellectual Level	323
Form and Genre	324
Content Examination Strategies	326
Stages in Aboutness Determination	326
Next Steps in Subject Analysis	327
Conclusion	328
Notes	328
Suggested Readings	331
10 Systems for Vocabulary Control	333
Controlled Vocabularies	334
Controlled Vocabulary Challenges	336
Specific vs. General Terms	336
Synonymous Concepts	337
Word Form for One-Word Terms	337

Sequence and Form for Multiword Terms and Phrases	338
Homographs and Homophones	338
Qualification of Terms	339
Abbreviations and Acronyms	339
Popular vs. Technical Terms	340
Subdivision of Terms	340
Precoordination vs. Postcoordination	340
General Principles for Creating Controlled Vocabularies	341
Specificity	341
Literary Warrant	342
Direct Entry	342
General Principles for Applying Controlled Vocabulary Terms . . .	342
Specific Entry and Coextensive Entry	343
Number of Terms Assigned	344
Concepts Not in Controlled Vocabulary	345
Index Terms for Names	345
Mechanics of Controlled Vocabularies	345
Types of Controlled Vocabularies	349
Subject Heading Lists	349
Library of Congress Subject Headings (LCSH)	349
Sears List of Subject Headings (Sears)	349
Medical Subject Headings (MeSH)	352
Thesauri	354
Art & Architecture Thesaurus (AAT)	354
Thesaurus of ERIC Descriptors	356
Ontologies	357
Natural Language Approaches to Subjects	359
Natural Language Processing (NLP)	360
Keywords	363
Tagging and Folksonomies	364
Conclusion	367
Notes	368
Suggested Readings	371
11 Systems for Categorization	375
What Are Categories, Classifications, and Taxonomies?	376
Theory of Categorization	379
The Rise and Fall of the Classical Theory of Categories	380
Cracks in the Classical Theory	380
Prototype Theory	382
Bibliographic Classification	383

Hierarchical, Enumerative, and Faceted Classifications	384
Major Bibliographic Classification Schemes.	388
Classification Concepts	390
Broad vs. Close Classification.	390
Classification of Knowledge vs. Classification of a Particular Collection	391
Integrity of Numbers vs. Keeping Pace with Knowledge	392
Fixed vs. Relative Location.	394
Closed vs. Open Stacks.	394
Location Device vs. Collocation Device	395
Classification of Serials vs. Alphabetical Order of Serials . . .	396
Classification of Monographic Series (Classified Separately vs. Classified as a Set)	397
Systems for Categorization and the Internet	398
Categories and Taxonomies on the Web	399
Classification on the Internet	402
Clustering Search Results	404
Conclusion	405
Notes.	407
Suggested Readings	410
Conclusion.	417
Note	418
Appendix A: An Approach to Subject Analysis.	419
Example	420
Appendix B: Arrangement of Physical Information Resources in Libraries	429
Notes	432
Appendix C: Arrangement of Metadata Displays.	433
Filing History	434
General Rules for Arrangement	435
Filing/Display Dilemmas	436
Notes	439
Glossary	441
Selected Bibliography.	479
Index.	499
