

# Variational Problems & Mixed Formulations of coupled systems of mechanics and diffusion

Ralph Showalter  
Oregon State University

April 5, 2013

We review the historical development of some basic results on the solvability of equations in function spaces and describe some applications to various initial-boundary-value problems of fluid flow and mechanics.

The lecture will take place in Thackeray 704 at 3:30pm.  
Refreshments will start at 3:00pm.
