

Unique international Psychiatric Research Training Opportunity

A National Institutes of Health funded research training grant with a focus on schizophrenia

This collaboration between premier university sites in Egypt, India, and the United States provides a unique opportunity for academic and career growth that involves two types of training.

MEDIUM TERM TRAINING (SIX MONTHS)

What does the training offer?

A combination of didactic and local personalized training by international faculty designed to provide:

- a strong foundation in research methodology and ethics
- experience in protocol, consent, and research design

Successful completion will lead to official program certification.

Who can apply?

Psychiatric residents, physicians, master's level psychologists/social workers, and other mental health professionals with a strong interest in research.*

Restricted to citizens of India or Egypt.

*Medical student applications are restricted to India. Only those with strong academic records and a strong commitment to improving psychiatric treatment interventions should apply.

LONG TERM TRAINING (TWO TO FOUR YEARS)

What does the training offer?

A combination of national and international didactic training designed to provide a strong foundation in research methodology and ethics; protocol, consent, and research design; hands-on research and faculty mentoring.

Long term trainees may receive additional training at collaborating sites.

Who can apply?

Long term trainees must be enrolled in a relevant **Master's or PhD** program at an accredited university/institution in India or Egypt.

How to apply?

A resume, essay, and interview are required by all applicants.
