What is the future of epidemiology?

[Raj Bhopal](#) , [Gary J Macfarlane](#) , [William Cairns Smith](#) , [Robert West](#) , on behalf of the Management Executive Committee for the XIX World Congress of Epidemiology

Epidemiology is thriving. The striking features of contemporary epidemiology are diversity, change, and global reach: from society to the molecule, responding to technical advances and changing patterns of disease. The two main challenges are: translating epidemiology into evidence, practice, and ultimately better health; and strengthening epidemiology research capacity, particularly in low-income and middle-income countries.

“...Supercurso (2) una colección dinámica de presentaciones sobre epidemiología y salud global, es un excelente ejemplode conectividad global”

Welcome to Supercourse

Supercourse is a repository of lectures on global health and prevention designed to improve the teaching of prevention. Supercourse has a network of over 56000 scientists in 174 countries who are sharing for free a library of 4875 lectures in 31 languages. The Supercourse has been produced at the WHO Collaborating Center University of Pittsburgh, with core developers Ronald LaPorte, Ph.D., Faina Linkov, Ph.D., Mita Lovalekar, M.D., Ph.D., and Eugene Shubnikov M.D. Please contact us at super1@pitt.edu.

Supercourse does not grant degrees or certificates, but is designed to be a resource for teachers, professors, and other educators. Supercourse does not provide access to faculty members developing the modules.

“Salud es el estado de completo bienestar físico, mental y social y no sólo la ausencia de enfermedad”. (OMS)
